

FMG (Friday Media Group)

Product & Customer Support Documentation

Important: This is fictional documentation created for an AI Customer Support Engineer portfolio project. All products, plans, limits, policies, and procedures in this document are dummy information.

1. Product Overview

What is FMG CloudHub?

FMG CloudHub is a fictional cloud-based workspace created by Friday Media Group (FMG). It allows customers and teams to securely store, organize, upload, download, and share digital files from a web browser.

Key Features

The platform provides cloud file storage, folder organization, secure file sharing, account management, subscription management, billing controls, and basic collaboration features.

Supported Access

Customers can access FMG CloudHub through supported desktop and mobile web browsers. An internet connection is required for cloud synchronization and file transfers.

2. Account Creation

Creating an Account

To create an FMG CloudHub account, select **Create Account** on the FMG CloudHub login page. Enter your full name, email address, and a password that meets the minimum password requirements. Accept the Terms of Service and Privacy Policy, then select **Create Account**.

Email Verification

A verification email is sent to the registered email address. Select the verification link to activate the account. If the email does not arrive within 10 minutes, check the spam or junk folder and request a new verification email.

Account Requirements

Each customer should use a valid email address. One email address can be associated with one FMG CloudHub account.

3. Login and Password Reset

Logging In

Enter your registered email address and password on the FMG CloudHub login page, then select **Log In**.

Forgot Password

If you forget your password, select **Forgot Password**, enter your registered email address, and request a reset link. Use the link in the email to create a new password.

Password Reset Link

For security, password reset links expire after 30 minutes. If the link has expired, request a new reset email.

Account Lockout

After 5 unsuccessful login attempts within 15 minutes, the account is temporarily locked for 15 minutes. Customers can wait for the lockout period to end or use the password reset process.

4. Subscription Plans

Plan Overview

FMG CloudHub offers three fictional subscription plans designed for different storage needs.

Plan	Monthly Price	Storage	Max File Size	Support
Starter	\$0	5 GB	250 MB	Community support
Professional	\$12	100 GB	5 GB	Email support
Business	\$35	1 TB	20 GB	Priority email support

Changing Plans: Customers can upgrade or downgrade from the Billing & Subscription page. Upgrades take effect immediately. Downgrades take effect at the start of the next billing cycle.

5. Billing and Refunds

Billing Cycle

Professional and Business plans are billed monthly on the subscription start date. The billing date may change after an upgrade or subscription renewal.

Payment Methods

FMG CloudHub accepts fictional supported credit and debit card payments through its secure payment processor.

Failed Payments

If a payment fails, FMG CloudHub sends an email notification. The system retries the payment up to 3 times over 7 days. If payment remains unsuccessful, paid features may be suspended.

Refund Policy

Customers may request a refund within 7 days of an initial paid subscription charge. Refund requests are reviewed by the FMG support team. Approved refunds are normally returned to the original payment method.

Cancellation

Customers can cancel a paid subscription at any time. Cancellation stops future recurring charges but does not automatically refund previous charges.

6. File Upload and Download

Uploading Files

Open the desired folder, select **Upload**, choose one or more supported files, and wait for the upload to complete. Do not close the browser while an upload is in progress unless the interface confirms that the upload is complete.

Downloading Files

Select a file and choose **Download**. The file is downloaded to the browser's configured download location.

Upload Failures

If an upload fails, check the maximum file size for the current subscription plan, verify the internet connection, and retry the upload. Large files may take longer to process.

File Sharing

Professional and Business customers can generate a share link for supported files. Share links can be disabled from the file's sharing settings.

7. Data Storage Limits

Storage Allocation

Starter accounts include 5 GB, Professional accounts include 100 GB, and Business accounts include 1 TB of storage.

When Storage Is Full

When an account reaches its storage limit, new uploads are blocked until space is freed or the customer upgrades the subscription.

Freeing Storage

Customers can permanently delete unnecessary files and empty the Trash to reclaim storage space.

Storage Calculation

Storage usage includes uploaded files and files retained in the account's active storage area. Temporary upload data is removed automatically after processing.

8. Security and Privacy

Account Security

FMG CloudHub uses encrypted connections for data transmitted between the customer's browser and the service. Customers should use unique passwords and avoid sharing login credentials.

Password Protection

Passwords should never be shared with FMG support staff. Support representatives will not request a customer's password.

Data Privacy

FMG CloudHub is a fictional service for this portfolio project. In this fictional policy, customer account information is used to provide and operate the service.

Security Incidents

Customers who believe their account has been compromised should immediately reset their password and contact FMG Support.

Support Verification

For account-specific support, FMG Support may request non-sensitive verification information. Customers should not provide passwords or complete payment card numbers.

9. Troubleshooting

Website Will Not Load

Check the internet connection, refresh the page, and try a supported browser. If the issue continues, clear browser cache and cookies.

Cannot Log In

Confirm the email address is correct, check that Caps Lock is not enabled, and use the password reset process if necessary.

File Upload Is Stuck

Check the internet connection and file size. Cancel the upload and retry. If multiple files are being uploaded, try uploading one file at a time.

Downloaded File Cannot Be Opened

Confirm that the download completed successfully and that the file type is supported by an appropriate application.

Storage Shows Incorrect Usage

Refresh the storage page and check the Trash. Recently deleted files may still appear until the storage calculation is updated.

10. Common Errors

Error: AUTH-001 — Invalid Credentials

The email address or password is incorrect. Verify the credentials or reset the password.

Error: AUTH-002 — Account Temporarily Locked

Too many unsuccessful login attempts were detected. Wait 15 minutes and try again.

Error: FILE-001 — File Too Large

The selected file exceeds the maximum file size for the current subscription plan.

Error: FILE-002 — Upload Failed

The upload could not be completed. Check the network connection and retry.

Error: STORAGE-001 — Storage Limit Reached

The account has reached its storage limit. Delete files or upgrade the subscription.

Error: BILL-001 — Payment Failed

The latest payment could not be processed. Verify the payment method and retry.

11. Frequently Asked Questions

Q: How do I reset my password?

A: Select Forgot Password on the login page, enter your registered email address, and follow the password reset instructions.

Q: How much storage does the Professional plan provide?

A: The Professional plan provides 100 GB of storage.

Q: What happens when I reach my storage limit?

A: New uploads are blocked until you delete files to free space or upgrade your subscription.

Q: Can I cancel my subscription?

A: Yes. You can cancel from the Billing & Subscription page. Cancellation prevents future recurring charges.

Q: Can I request a refund?

A: A refund may be requested within 7 days of an initial paid subscription charge. Requests are reviewed by FMG Support.

Q: What should I do if I cannot log in?

A: Verify your email address and password. If you forgot your password, use the Forgot Password process.

Q: What is the maximum file size?

A: Starter allows files up to 250 MB, Professional up to 5 GB, and Business up to 20 GB.

Q: Can I share a file with another person?

A: Professional and Business customers can create share links for supported files.

Q: Will FMG Support ask for my password?

A: No. FMG Support representatives should never request your password.

Q: What should I do if I see an error I do not understand?

A: Record the error code, describe what you were doing when it appeared, and contact FMG Support. Providing the error code helps the support team investigate the issue.

Document Purpose: This fictional documentation is intended to serve as a knowledge base for testing an AI Customer Support Engineer. The information is deliberately dummy content and should not be treated as real FMG policy or product documentation.
